

iMH can provide immediate access to psychiatrists and mental health services to help support your patients' needs.

iMH delivers an innovative model of private mental health care to ensure the right care at the right time in the right location to suit the individual needs of patients.

iMH provides both overnight hospital services, day patient programs for group therapy and community based care under the supervision of the patient's treating psychiatrist.

iMH proudly provides mental health treatment and services for patients across the age spectrum from adolescents to older persons. We also offer extended post discharge care.

Key specialty areas of focus include mood disorders, adolescent and adult mental health, addictive disorders, personality disorders, trauma and anxiety disorders.

Coming 2024 Hirondelle Private Hospital

With 45 mental health beds, their team of psychiatrists, medical, nursing and allied health professionals will provide a wide range of treatments across inpatient, outpatient and community settings through flexible care pathways.
